SUMMARY

Aspiring Data Engineer with hands-on knowledge of building ETL pipelines using AWS S3, AWS Glue, Amazon Redshift, and Apache Spark. Proficient in Python, PySpark, and SQL, with a strong understanding of data extraction, transformation, loading, data warehousing, and data modeling. performance optimization. Passionate about building scalable and reliable data solutions and seeking an entry-level Data Engineer opportunity to apply and grow my technical skills.

EDUCATION

Bachelor of computer science

Savitribai Phule Pune University

B.P.H.E.Societys Ahmednagar College, Ahilyanagar

SKILLS

Languages: Python, PySpark, SQL

Data Engineering: ETL/ELT, Apache Spark, PySpark, Data Pipelines, Data Modeling, Data Warehousing

AWS Cloud: AWS S3, AWS Glue, Amazon Redshift, AWS Lambda.

Databases: PostgreSQL, Amazon Redshift.

Big Data & Processing: Apache Spark, PySpark.

Orchestration & DevOps: Apache Airflow, Git, GitHub, CI/CD

CERTIFICATES

SQL / Database Certification -- AI NEXUS IT INSTITUTE

LANGUAGES

- ENGLISH, HINDI, MARATHI

PROJECTS

Smart Parking System:

- Built an ETL data pipeline using PostgreSQL, AWS S3, AWS Glue/PySpark, and Amazon Redshift.
- Extracted and transformed parking data using Python, SQL, and PySpark.
- Loaded processed data into Amazon Redshift for analytics and reporting.
- Implemented data validation, vehicle tracking, parking status, and automated charge calculation.
- Tech Stack: Python | SQL | PostgreSQL | AWS S3 | AWS Glue | PySpark | Amazon Redshift | ETL/ELT | Power BI

COURSES

Data Engineering Intern — Pune, MH

AINEXUS IT INSTITUTE

- Practiced SQL queries on real-world datasets.
- Worked with joins, subqueries, CTEs, window functions, and data aggregation.
- Created tables, relationships, and analytical reports using SQL
